APRIL 2024 OPERATING RESULTS

In April 2024, the demand for air travel remained robust across all route regions. The Singapore Airlines (SIA) Group's passenger traffic grew by 11.9% from a year before, while passenger capacity increased by 13.2%.

The two airlines carried 3.17 million passengers in total, 17.8% higher than a year ago. Group passenger load factor (PLF) came in at 87.2%, with SIA and Scoot posting monthly PLFs of 86.4% and 90.1% respectively.

Cargo loads increased by 26.4% year-on-year, outpacing the capacity expansion of 9.4% for the same period, partly supported by demand spillover from security concerns in the Red Sea. Consequently, the cargo load factor came in at 58.6%, 7.9 percentage points higher than a year before.

On 5 April 2024, SIA commenced four-time weekly passenger flights to Brussels. This increases the number of European destinations in the Group's passenger network to 15.

At the end of April 2024, the Group's passenger network¹ covered 122 destinations in 36 countries and territories. SIA served 77 destinations, while Scoot served 67 destinations. The cargo network¹ comprised 126 destinations in 37 countries and territories.
