## **JUNE 2024 OPERATING RESULTS**

The demand for air travel remained robust across all route regions in June 2024, supported by the mid-year school holidays in Singapore and the summer travel season. The Singapore Airlines (SIA) Group's passenger traffic rose by 7.2% from a year before, while passenger capacity increased by 11.0%.

During the month, SIA and Scoot carried nearly 3.2 million passengers in total, 9.7% higher year-on-year. The Group passenger load factor (PLF) was 87.4%, with SIA and Scoot posting monthly PLFs of 87.1% and 88.7% respectively.

Cargo operations posted a load factor of 58.0%, 6.4 percentage points higher than the year before. Cargo loads rose by 24.9% year-on-year, supported by robust e-commerce demand, some demand spillover resulting from disruptions to sea freight, and port congestion. This outpaced the capacity expansion of 11.0% for the same period.

During the month, SIA and Scoot launched new services to London (Gatwick) and Sibulahi respectively.

At the end of June 2024, the Group's passenger network<sup>1</sup> covered 125 destinations in 36 countries and territories. SIA served 78 destinations, while Scoot served 69 destinations. The cargo network<sup>1</sup> comprised 129 destinations in 37 countries and territories.
