In October 2011, Singapore Airlines' passenger carriage (measured in revenue passenger kilometres) grew 0.7%, on the back of 4.6% growth in capacity (measured in available seat kilometres). The number of passengers carried rose by 0.2%.

Passenger load factor (PLF) declined 2.9 percentage points to 76.7%. PLFs were largely weaker year-onyear, particularly for the Americas, Europe and East Asia regions. Capacity grew at a faster pace than the growth in demand for Americas and East Asia regions, while Europe was affected by overall softness in the market.

SilkAir's capacity grew 11.1% year-on-year against an 8.0% increase in systemwide passenger carriage. As a result, PLF declined 2.2 percentage points to 73.8%. The number of passengers carried increased 7.3%. In October, SilkAir began its thrice-weekly services to Bandung, Indonesia and Changsha, China. PLFs for all route regions declined compared to the same month last year.

Overall cargo traffic (measured in freight-tonne-kilometres) saw a year-on-year decline of 1.6% while cargo capacity decreased by 1.5%. Consequently, overall load factor decreased by 0.1 percentage points. Cargo load factor (CLF) increased for all regions, except for East Asia.
